

# XT 40

...a model of the Parolin line

The all new *Indoor -Outdoor-Endurance XT 40* is a leading edge, state of the art vehicle that presents extreme heavy duty rental kart capability, being at the same time fully racing-bred, as all *PAROLIN RACING KART's* products. Tube cutting and welding are performed using laser technology machines and tube bending with CNC fully automatic machines. Tube ends are cut by laser prior to welding in order to allow a flawless seam. Accessories are cut from best aluminum or steel solid pieces with state of the art CNC fully automatized machines and held to tight tolerances. All these operations are performed within *PAROLIN RACING KART's* facilities.

## Short description

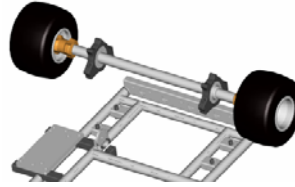

## Other unique features

Extremely solid chassis, made of seamless **special Cr Mo steel tubes** of 40 mm in diameter. Powder coated in metallic blue, fluo orange, Parolin Red or metallic gray, black and metallic black

**Easily removable from the top axle**  
With only unscrewing four accessible bolts, the axle and rear brake can be removed. This adds to the vehicle's ease of maintenance and repair. Axle is 40 mm in diameter 5 mm thick, is supported by two bearings.  
Thaks to this system is possible change the **wheel base** : displacement of **15 mm**

### Possible tyre configuration feature
