

# NEW HOMOLOGATION 2005

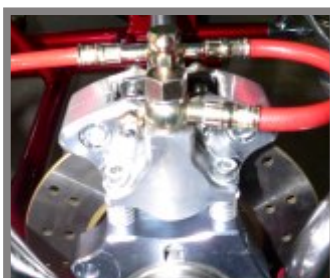

Welcome to our Parolin Magazine News!

With great satisfaction, we introduce you our new MINI and BABY Parolin chassis. Made of seamless special Cr Mo steel tubes, they are the first real high-tech chassis performed using laser technology machines, tube bending with state of the art CNC machines and solid aluminium accessories being done by fully automatized lathes and vertical centres. The rear axle is supported by two bearings and is 30 mm hollow.

Available in two versions: the basic one fitting the standard brake and the motorsport one having a self-adjusting hydraulic brake system with radial fittings and presenting top features.

The new aerodynamic streamlined bodyworks are performed within PAROLIN RACING KART's facilities.

Self adjusting radial fitting

New homologation 2005 bodyworks

Billet alloy pedals option

Adjustable bearing holders
