

Indoor Master Tandem

...a model of the Parolin line

The all new *Indoor Master Tandem* is a vehicle that presents extreme heavy duty rental kart capability, being at the same time fully racing-bred, as all *PAROLIN RACING KART's* products.

It is designed to be used by two persons, remaining at the same time light and fun to drive. The Tandem driving is a unique experience. It completes the range of possibilities any Indoor facility can offer to it's clients. Father and son, boyfriend and girlfriend, husband and wife, everybody can have fun together in this fantastic vehicle.

Tube cutting and welding are performed using laser technology machines, and tube bending with CNC fully automatic machines.

Tube ends are cut by laser prior to welding in order to allow a flawless seam.

Accessories are cut from best aluminum or steel solid pieces with state of the art CNC fully automatized machines and held to tight tolerances.

All these operations are performed within *PAROLIN RACING KART's* facilities.

Short description

Extremely solid chassis, made of seamless special Cr Mo steel tubes of 32 mm in diameter. Powder coated in metallic blue, fluo orange, Parolin Red or metallic gray.

High impact energy polymer bumper supports

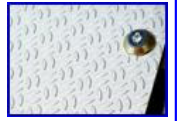

Reinforced steering column

Reinforced double pedals

High Fidelity disassemblable and reinforced stub axle, with 4 bearings, 10 mm bolt, and 17 mm pin

Anti slip surface (option) aluminum floor tray

Rear cover prevents hair, scarves and such from entangling with rotating parts (option)

Mechanic brakes, steel disk

Heat treated reinforced 180/125 aluminum wheels with triple bead retention system and 17 mm stub pin hole

Lower knuckle support reinforcement.

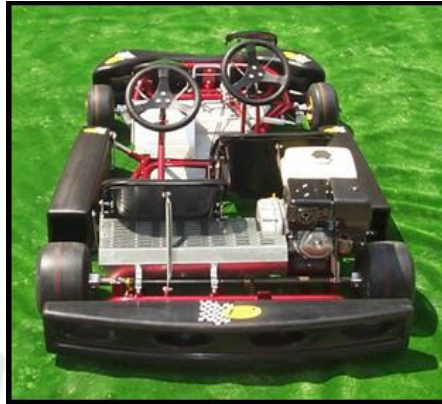

Reinforced steering lock.

Honda GX270

Options

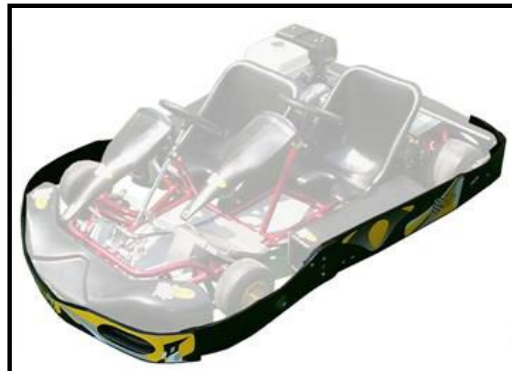

CPS, Clutch Protection System (Option)

This feature avoids the simultaneous use of the gas and brake pedals increasing the clutch's service life.

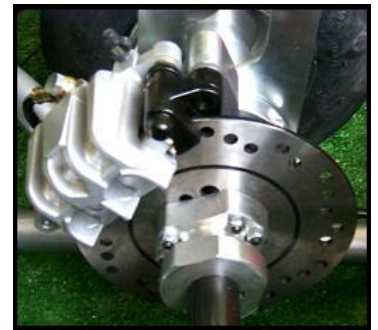

Polymer bumpers (option)

The use of a polymer bumper and its low friction coefficient (compared to steel bumpers) allows two vehicles to slide one against each other at the event of collision. It is also lighter and less noisy at collision than its steel counterpart.

Hydraulic brakes (option)

Hydraulic "motorcycle" rear disk brakes. Self adjusting, with two 27 mm pistons. Disk is 180 mm in diameter and 4 mm thick

More optional features

External exhaust pipe kit complete with silencer (located under the rear cover)	Roll bar	Belt and pulleys kit	Spoiler and front fending (standard feature)
Chain and Sprockets Kit (specify n° of teeth)	VIA RENT or SIAMES	Specify n° of teeth	Red
Steel chain sprocket, from 29 to 33 teeth, 428	Tires	Wheels	Black
Steel engine sprocket, from 12 to 15 teeth, 428	10x3.60-5 / 11x6.00-5	180-125mm reinforced and heat treated aluminum with 20 mm bolt	Blue
EUROSTAR chain (428 HR)	10x4.50-5 / 11x7.10-5		Hydraulic brakes
Anti slip surface floor tray	Gasoline pump kit	Clutch Protection system	Polymer all round bumpers
